See what others can't.

REDUCING
Human Analytical Process

IMPROVING
PED Resiliency

EMPOWERING
Faster Decision Making

ANUBIS is an immersive environment bringing augmented reality to the PED world like it has never been seen before. Analyst's will be able to use their own data and see it presented in one wholistic environment, seamlessly integrating Full-Motion Video into your geospatial world. The days of needing multiple applications to conduct a typical PED mission are over.
