About
Cubic Digtial Intelligence

Cubic Digital Intelligence (CDI) delivers the information advantage

with a modular open data architecture approach that provides

unmatched shared situational awareness for Operational

Commanders across all domains at the tactical, operational, and

strategic levels. Our highly agile capabilities deliver a real-time

situational overview of the intelligence and operational environment

to support decision making at every echelon.

Data-Driven Decisions

Unmatched PED Capabilities

Delivery of GEOINT & Foundation Imagery at the Edge

Scalable FMV Management & Dissemination

Rapid Video Enhancement

Wide Area Motion Imagery

Cubic Digital Intelligence Delivers Information to the Warfighter
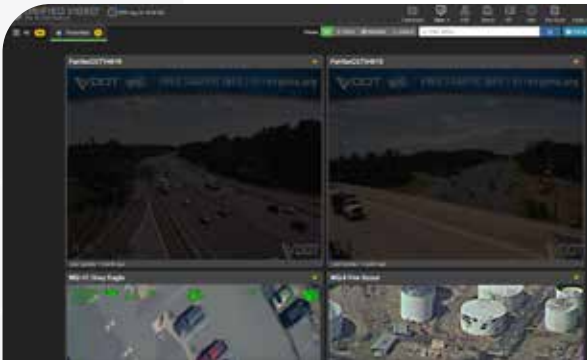

Strike Suite Ecosystem

Fully Immersive FMV

Fully immersive FMV PED exploitation solution. ANUBIS merges full frame real-time video and geospatial data into one wholistic geospatial environment.

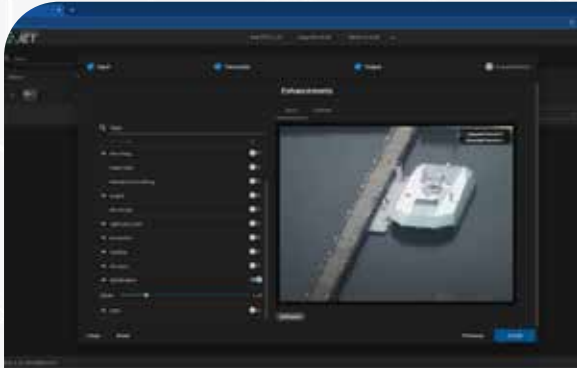

Simple and Secure FMV Management

Provides a secure video management solution that makes viewing, managing, and understanding large amounts of real-time or archived video, simple.

3rd Party Software

A display-agnostic Tactical Data Link host software application, capable of combining disparate TDL networks by translating incompatible protocols and waveforms.

Video Encoding, Transcoding and Enhancement

Low latency video encoding and transcoding software which provides enterprise wide video enhancement capabilities.

Fast and Efficient Access to the Data You Need

HiPER LOOK is a high performance geospatial server for cataloging, organizing, and sharing large volumes of map, imagery, and terrain data.

3rd Party Software

ICE delivers the ability to communicate using IP while integrated into existing radio systems using encrypted channels in a secure and scalable way.
Deliver decisive and effective fire support from any platform, anywhere in the world.

Cubic Digital Intelligence Strike Suite ensures combat commanders have uninterrupted access to real-time intelligence independent of larger data networks to store and deliver information. It is a communication agnostic platform which interfaces to TDL, CDL, SATCOM and Tactical Radio systems.

Cubic Digital Intelligence Strike Suite is an integrated and flexible software defined C5ISR solution that enables joint fires and effects, remote targeting and enhanced situational awareness by fusing multi-domain battlefield data.

M3-SE FAMILY

The M3-SE is an enterprise-class compute and networking platform that delivers powerful modular Intel processing, Cisco networking, and large capacity storage to the tactical edge.

POWERFUL COMPUTE

The M3-SE-VSVR5-P high-powered computer platform with 16 physical cores and up to 128 GB of RAM is designed to support multiple virtual machines in a single small form factor module.

AI AND MACHINE LEARNING READY

Powered by dual NVIDIA GPUs, the M3-SE GPU module delivers class-leading performance in a low power, compact, and easily transportable solution.

POWER SUPPLY

The M3-SE-PA-P provides seamless, reliable battery power backup in the event of external DC power loss.

24 PORT CISCO SWITCH

The M3-SE-SW24G is a small form factor stackable switch module that provides an unmatched 100 watts of POE power to support Power over Ethernet (POE) capability.

CROSS DOMAIN SOLUTIONS

Cubic XD offers a full range of Raise-The-Bar (RTB) compliant, Unclassified to Top Secret cross domain solutions.
