

CUBIC®

Digital Intelligence

# CUBIC DIGITAL INTELLIGENCE

TRANSFORM YOUR INTELLIGENCE ECOSYSTEM  
INTO A CAPABILITY ADVANTAGE

# Cubic Digital Intelligence

Empowering the warfighter and intelligence community with a capability advantage through solutions that are...

## Data-unified

Aggregate and deliver data securely in near real-time with seamless platforms to strengthen shared situational awareness

## Data-enhanced

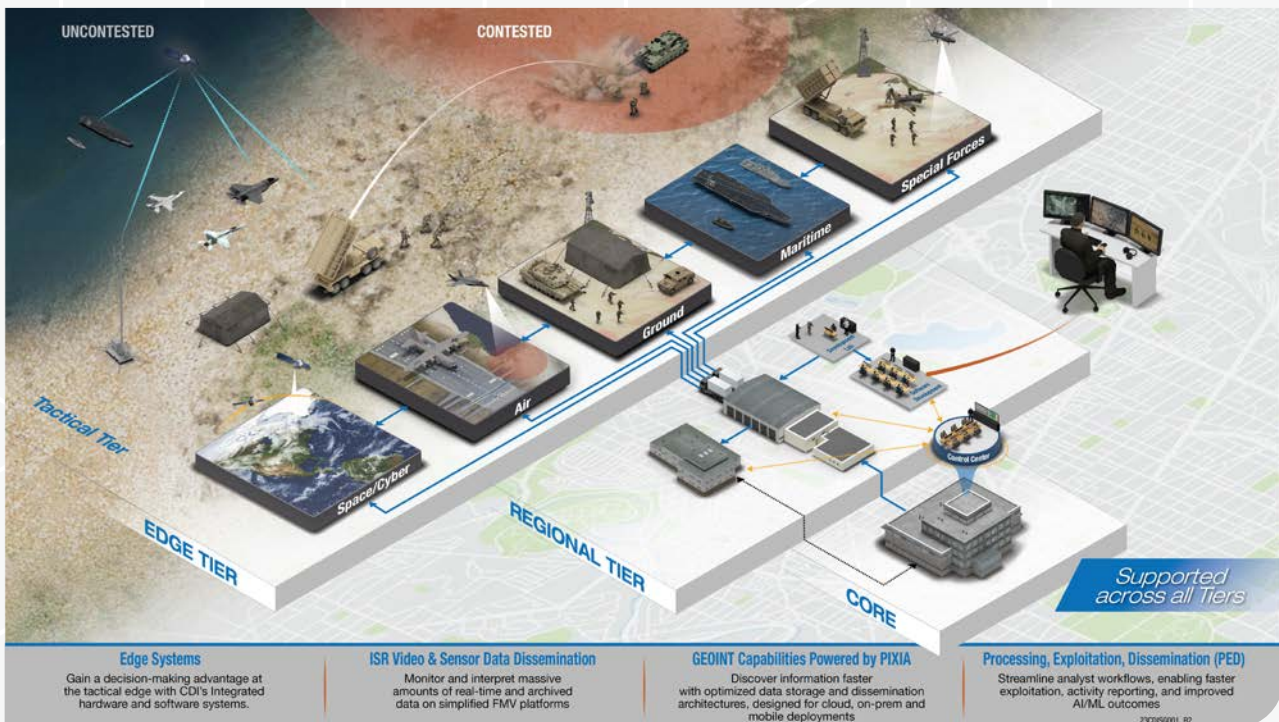

Turn your AI/ML results into critical intelligence through enhanced FMV and geospatial data

## Data-accelerated

Perform faster data analyses to enable mission agility from the edge to the enterprise

The collection and analysis of FMV and geospatial data is critical for defense and intelligence agencies. Cubic Digital Intelligence provides unmatched shared situational awareness for Operational Commanders across all domains and echelons.

# Cubic Digital Intelligence accelerates FMV and geospatial data discovery and analysis across every echelon

## Edge Systems

Gain a decision advantage with CDI hardware and software combined into complete systems for use at the tactical edge.

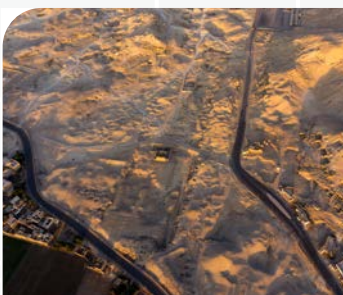

## Processing, Exploitation, Dissemination (PED)

Streamline analyst workflows, enabling faster exploitation, activity reporting, and improved AI/ML outcomes.

## GEOINT Capabilities

Find what you are looking for quickly with optimized data storage and dissemination architectures in the cloud, on-prem or mobile.

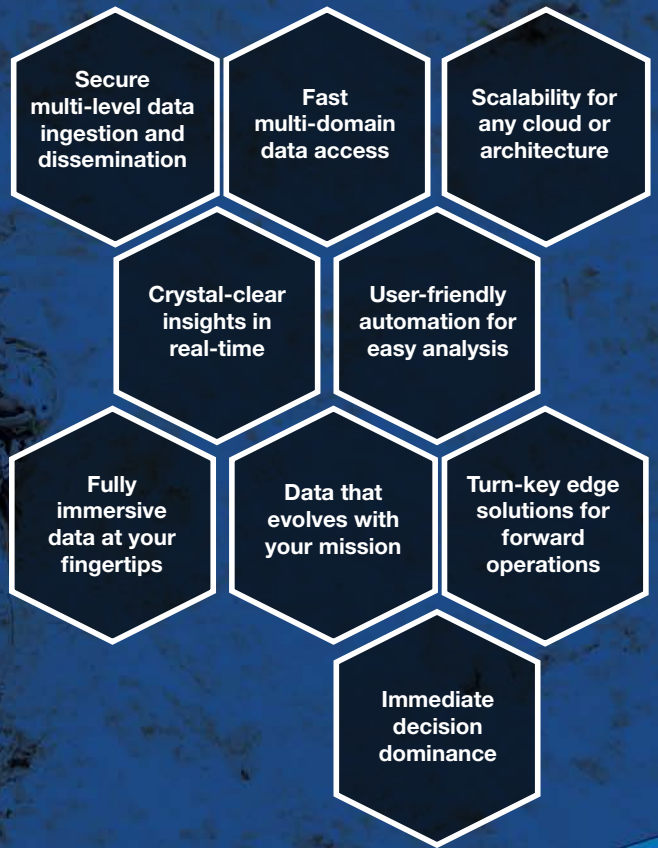

## ISR Video & Sensor Data Dissemination

Manage, improve, and understand massive amounts of real-time or archived data on simplified FMV platforms.

Make critical decisions  
with confidence and  
speed with Cubic
